

ABOUT US

Jay Engineering is Manufacturer and Exporter of Brass Components in Jamnagar (City Of Brass), Gujarat. We have an experience more than 10 years in a Brass Industry. We are an ISO 9001 : 2008 Certified Company. In 2004 had immigrated into the brass part world for manufacturing of brass components. With wide experience today we are successfully serving our products in so many industries like electrical and electronic, automobiles, gas and compressor, sanitary fittings, railway, and many other industries.

With the view of diversification and customer demand today we are serving various types of Brass Components like Cable Gland, Stopping Plug, Reducer, Adapter, Enlarger, Locknut, Clamp, Split Bolts, Sliding Pad, Ppr Inserts, Cpvc Inserts, Safety Valve, Neutral Link, Terminal Block, Water Filter Nozzle and many more. Along with brass we are manufacturing bronze and gunmetal components like suspension Bush, collar bush, Ring washer, cast saddle, tower earth clamp and Centrifugal Castings in bronze and gunmetal.

Our production passes through several quality checks as per requirements. We use all types of instruments and gauges as per requirement of components. Our plant is managed by skilled staff, right from purchase of raw material to finishing of goods.

It is our intention to become our customer's preferred supplier achieved by delivering a quality product in a timely manner, while being friendly, flexible and responsive to our customers' needs. We sincerely hope that you would grant us an opportunity to serve your esteemed organization.

Service We Provide

- Turning
- Drilling
- Milling
- Broaching
- Forged Metal Parts
- Centrifugal casting
- Assembly

Surface Treatment

- Nickel
- Tin
- Chrome
- Zink
- Copper
- Silver

QUALITY ASSURANCE

At Jay Engineering, quality is our prior concern. We adopt stringent quality control system to ensure that all our products comply with international quality standard. Our quality management system comprises of focused and detailed inspection procedures at each and every stage of production. Apart from stringent quality control norms, we believe in upgrading our products to meet the requirements of our worldwide customers.

All our products are specifically developed according to the industry specific needs of our customers. We take note of quality and design and develop the precision machined parts as per customer design.

We receive feed backs from our customers and accept their suggestion to improve and upgrade our products as per their requirement.

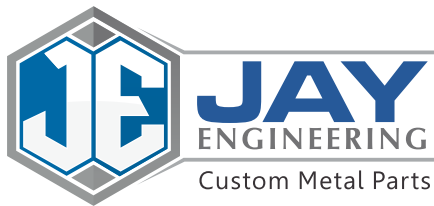

MISSION

Our mission is to provide our customers with innovative solutions, by means of quality products and services, for their varying needs at the most competitive price. We can translate your Ideas or Designs into viable products. We believe in making long-lasting business relation through our dedication and commitment towards customer satisfaction.

VISION

Working with the vision to provide our customers with the best quality products, we regularly upgrade our technology to meet the ever changing requirements of our customers. Our clients have always been satisfied with our performance and have appreciated our quest for excellence.
